- > 2 Professional Development Hours (PDH) for Professional Engineers under Missouri statutes
- > 2 Learning Units (LU) through the American Institute of Architects.

Name: _____

The above has participated in this program and earned 2 credits.

PROGRAM SUMMARY

The OSHA Leading Indicators Guideline defines leading indicators as "proactive, preventive and predictive measures that provide information about the effective performance of your safety and health activities. Conversely, lagging indicators measure the occurrence and frequency of events that occurred in the past, such as the number or rate of injuries, illnesses and fatalities.

Our speakers will explore the 3 P's of Leading Indicators: **Proactive, Preventative and Predictive**. "Identify hazards that are prevalent from data and set a plan to address so it's proactive, preventative and predictive," says Bill McDonald, OSHA.

You will learn Safety Best Practices from Murphy Company and Ameren on how they've implemented leading indicators successfully!
