5. Refreshments available after the event via Food Truck!

Safety Screening will be held at the door! Masks Required!

\*\*\*\*\*

This continuing education program is designed to qualify for 1 PDH/LUs. A certificate will be made available.

## Program Summary

Join us to explore the renovation and expansion of this exciting new project. Originally built as a Synagogue in 1950, COCA has occupied the University City property since 1986. Most recently they completed this ambitious new expansion which has transformed their space into a world class performing arts and education center.

Tour guides/small groups will take you through numerous areas of the building including the new Grand Entrance, the Historic renovation, Theater spaces and will also touch on the logistics of building a complex building on a small Urban site. The tour guides/presenters will include Kelly Pollock, Executive Director of COCA, Brian Corry, President at Kirkegaard, and Bob Johnson, Project Architect at Christner.

This Project was constructed by SM Wilson. The architectural team was Axi:Ome and Christner Architects.
