WORKFORCE CHALLENGES

IT'S HERE, NOW WHAT?

PROGRAM SUMMARY

Today we are experiencing more workforce challenges and more dramatic changes than we have for some time. US construction projects are short-staffed today, and the problem is set to get worse.

Some of the challenges we will explore:

- Workers Expecting Higher Wages
- Lack of Qualified Workers
- Competing with Other Industries for Workers
- Convincing Young People to Get into Construction
- Bigger Need for Specialized Skills
- Aging Workforce
- Craft Trade Shortages
- Remote Work
- Work Ethic Changes

So, these issues are here, now what to do we do about them? Via our panel we will hear thoughts on these challenges and how we address them moving forward.
